# Order-X Uploader Installation Guide

---

## OrderX Uploader System Requirement:

WindowsXP or Higher OS

1 GB RAM

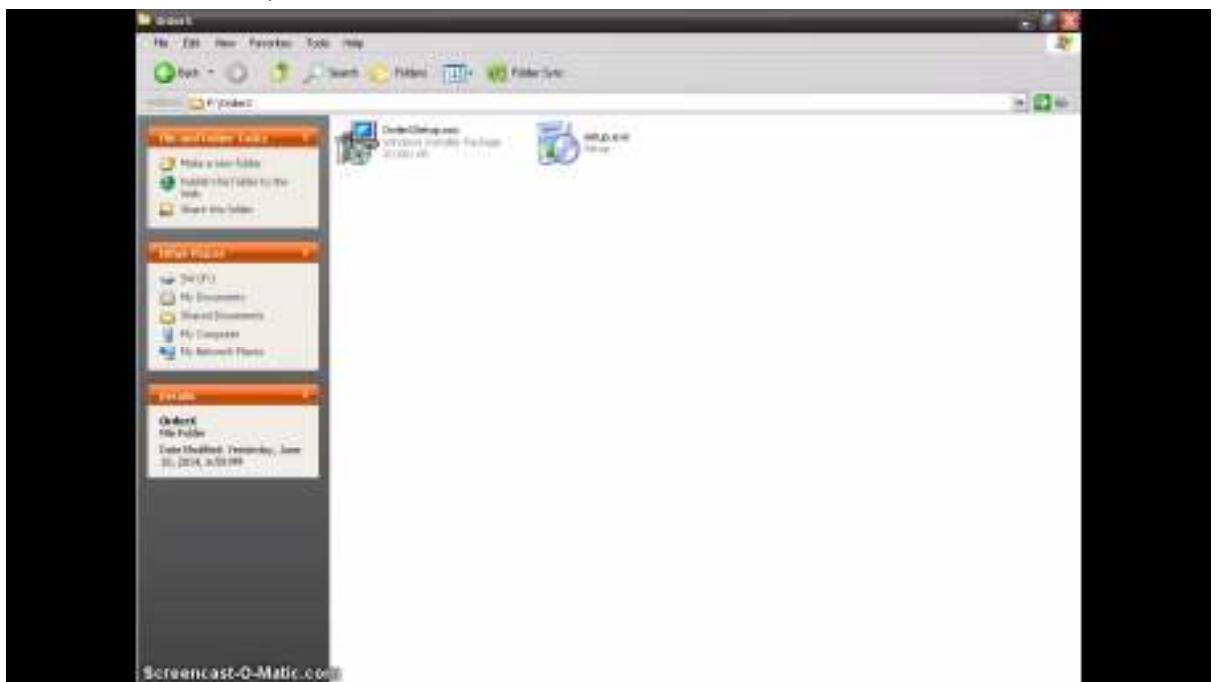

Duel core or higher processor

HDD

Internet Connection minimum 1MBPS

## How to install OrderX Uploader ?

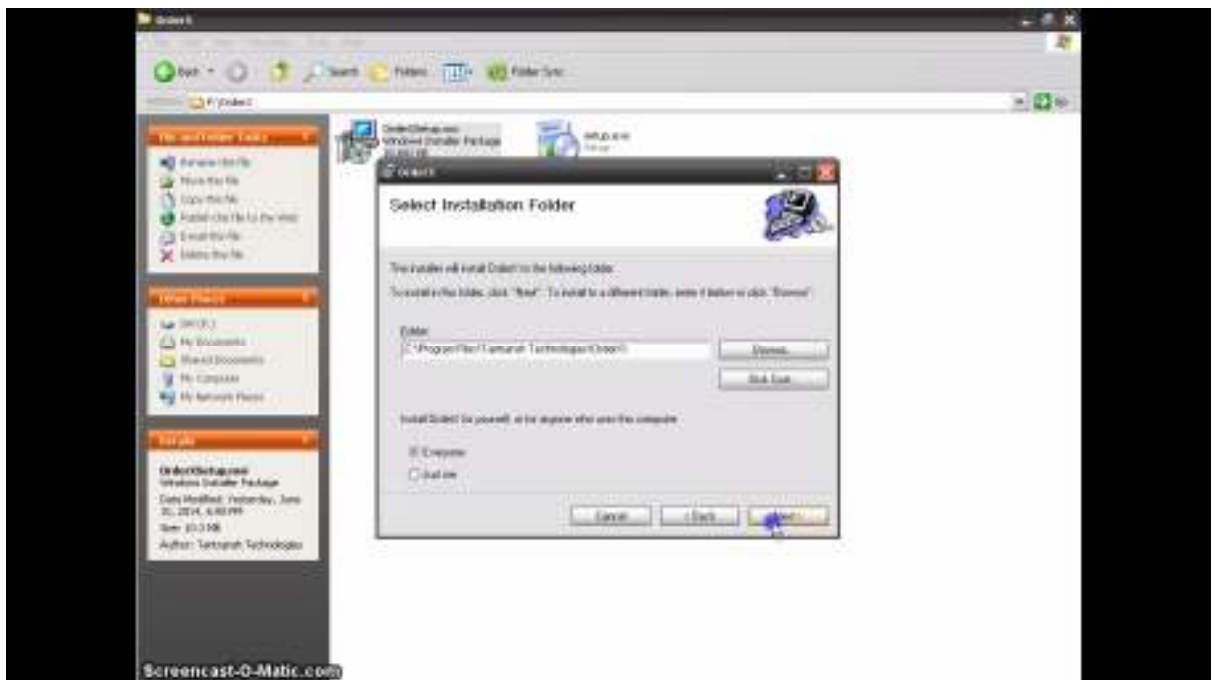

- 1) After successfully downloading the compressed setup file from the website, extract the setup file using WinRAR.
- 2) There will be two setup files inside the folder.

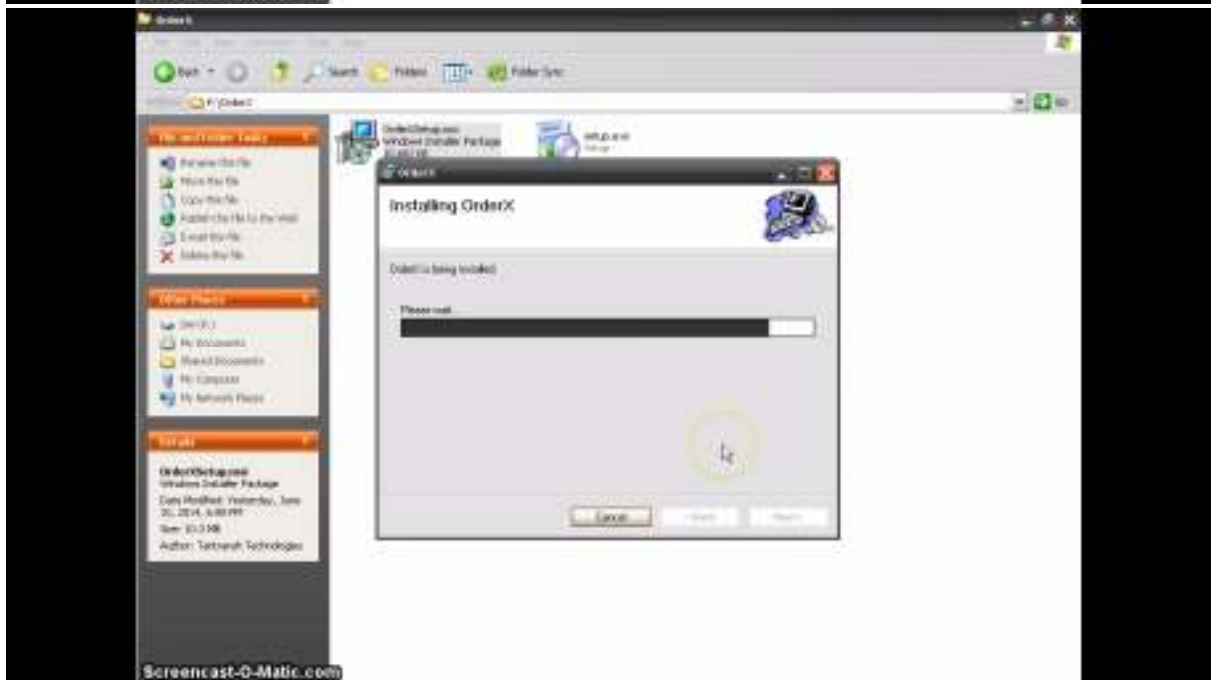

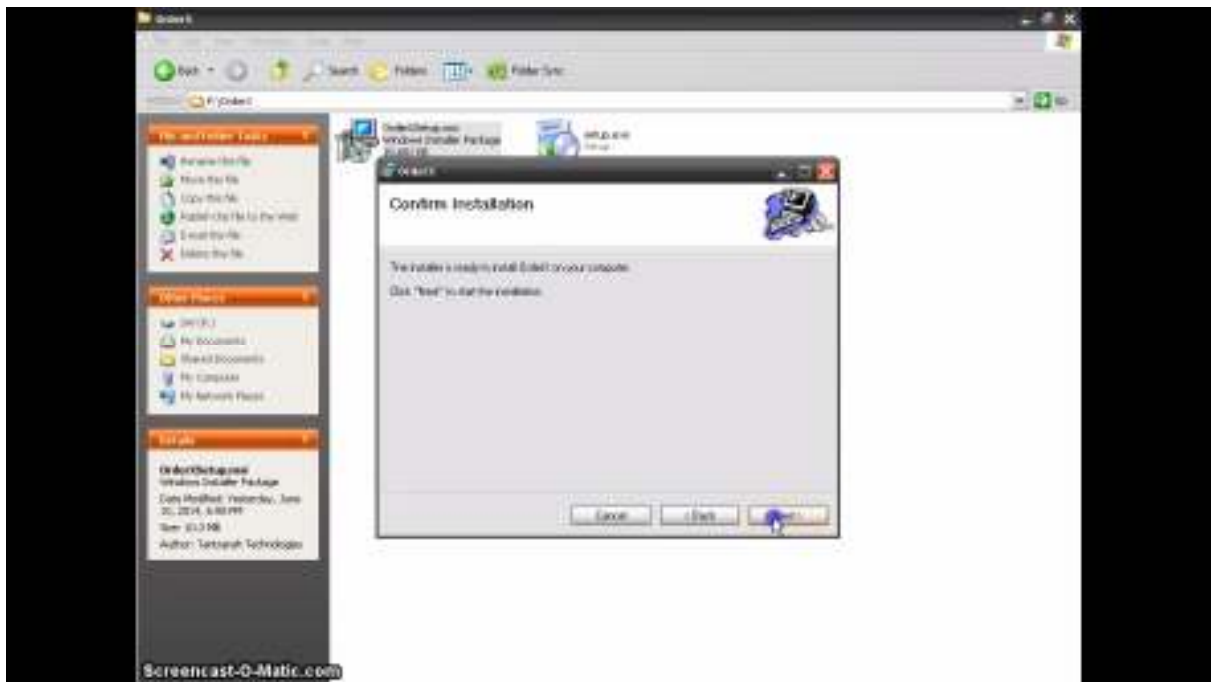

- 3) Double click on .msi file and follow installation wizard.

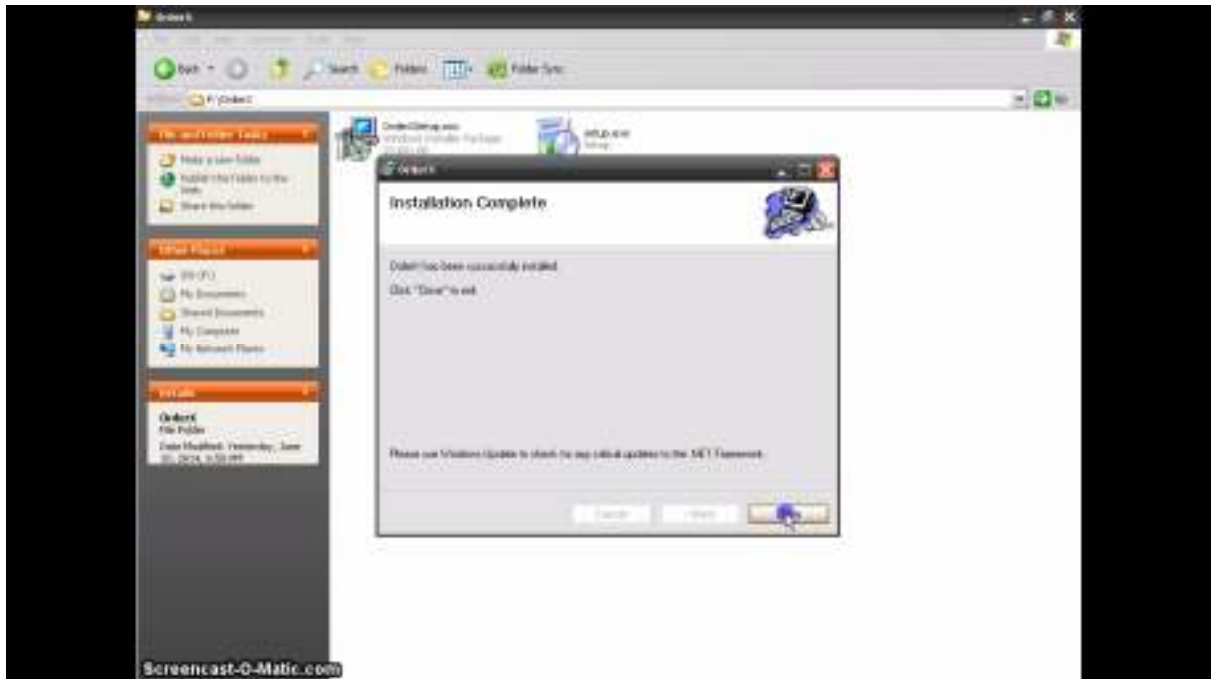

- 4) Choose the desired setting and click next button to complete the installation.

5) After the complete installation you will get successful installation message.

6) You can find OrderX shortcut on your desktop and in "All programs". Now OrderX ready to use.

7) For **Windows-7** or higher OS users before starting to use this app, right click on the OrderX shortcut and select properties.

7.1) In properties window select Compatibility tab.

7.2) Select the checkbox of “Run this program in compatibility mode for “ and select “Windows XP Service Pack 2” from below list.

7.3) Select another check box of “Run this program as an administrator” in same tab at “Privilege Level” panel and apply the setting.

7.4) Now you can use OrderX+ smoothly for Online ordering.

7.5) Repeat above steps whenever you format your computer and installing OrderX again.
